

Kristiyan Vakov

Software Developer · Full-stack .NET + Angular · Applied AI

Date of birth: 23/03/2008 **Nationality:** Bulgarian
Email: kristian.vakov@gmail.com **Phone:** (+359) 894 957 416
Location: Sofia, Bulgaria **GitHub:** github.com/kristiyanvakov
Portfolio: kristiyanvakov.github.io

ABOUT ME

Software developer who builds full-stack web applications in .NET and Angular, and AI systems that cite their sources and track their own cost. Working at Encorp.ai on AI automations and software development. Placed 2nd at the Atanasoff__48 hackathon and 3rd at Голямото Schwarz междучасие 3 “The Rise of AI” in 2026. Quick learner who stays calm under pressure and works well in a team.

WORK EXPERIENCE

Junior Developer · Encorp Bulgaria Ltd. (Encorp.ai)

15/09/2026 – Present · Sofia, Bulgaria

- Building software with React, Next.js and TypeScript.
- AI automations and integrations. Automation of business processes.

School production practice · Encorp Bulgaria Ltd. (Encorp.ai)

01/07/2026 – 01/09/2026 and 01/07/2025 – 01/09/2025 · Sofia, Bulgaria

- AI automations and integrations, and automation of business processes with n8n.

HACKATHONS AND AWARDS

3rd place · Голямото Schwarz междучасие 3 “The Rise of AI” (Schwarz Digits)

28–30 October 2026 · Sofia, Bulgaria

- **ABC Arena Agent:** reinforcement-learning agent for a 6-player retail simulation (1,000 rounds, 318-dimensional observation, 44-dimensional action space). Diagnosed an opening-collision failure behind roughly 85% of losses in bad matches, built a rule-based expert strategy, ran controlled DAgger and PPO/A2C fine-tuning experiments, reported the negative results honestly and shipped the best verified checkpoint.

Technologies: Python, Stable-Baselines3, Gymnasium, DAgger

2nd place · Atanasoff__48 hackathon

4 October 2026 · Theme “Energy around us”

- **Asta:** question-answering agent about energy in Bulgaria that answers from real Bulgarian and EU documents, cites its sources and verifies its own claims. Routes each question to the cheapest path that can answer it and logs tokens, time, cost and estimated energy per call.

Technologies: Python, Claude, OpenAI embeddings, PostgreSQL + pgvector, Streamlit, Docker

Game jams (2025): several events, developing games under tight deadlines

PROJECTS

TeamUp · team collaboration platform

- Workspaces, task management, inbox and invitations, and real-time chat over SignalR.
- Auth with ASP.NET Identity and JWT, PostgreSQL via EF Core, Docker, Swagger.

Technologies: .NET, ASP.NET Core, EF Core, PostgreSQL, SignalR, Angular, TypeScript, Docker

MemoryAtelier · e-commerce web shop

- Full purchase flow, role-based JWT auth (Admin and Customer), admin dashboard, transactional email templates and cloud image storage.

Technologies: .NET, ASP.NET Core, EF Core, PostgreSQL, Angular, TypeScript, Supabase

Shared Calendar · calendar app with Google and iCloud sync

- Save-first design where a failed push to Google or iCloud never loses an event; failed pushes are retried in the background.
- Fastify API with Zod validation, Google OAuth and CalDAV; Expo / React Native client.

Technologies: TypeScript, Expo / React Native, Fastify, Supabase, Docker
github.com/kristiyanvakov/Shared-Calendar-App

ARIA · personal desktop assistant (in progress)

- Desktop app that reads Gmail and Google Calendar, tracks homework and acts as a voice-driven mentor.
- Token-optimised AI: exact-match cache and a router that picks the cheapest model tier.

Technologies: Python, Flet, Supabase, OpenAI API, Gmail and Google Calendar APIs

Games: The Defender, Racing Dogs, The Belt

- 3D and 2D Unity games in C#, including a 12-wave village defence game with an inventory and economy system.

Technologies: Unity, C#

EDUCATION AND TRAINING

Secondary education, currently 12th grade

Vocational High School of Electronics "John Atanasov" (SPGE), Sofia · Present

First high school stage of secondary education

Vocational High School of Electronics "John Atanasov" (SPGE), Sofia · 15/09/2022 – 30/06/2025 · EQF level 3

- Extracurricular: Electronics and Electrical Engineering club, Communication Systems club, Computer Game Development club, additional modules in Mathematics and Computer Networks Basics.

Certificates: online safety training (National Center for Safe Internet and Telenor Bulgaria); English course, level CS/B+ (Faros)

SKILLS

Languages	C#, Python, TypeScript, JavaScript, Java, C++, SQL, HTML, CSS
Backend	ASP.NET Core, EF Core, REST APIs, SignalR (real-time), JWT and ASP.NET Identity, Fastify, Swagger
Frontend and mobile	Angular, React, Next.js, RxJS, Bootstrap, Expo / React Native
Databases and cloud	PostgreSQL, pgvector, Supabase, Docker, Cloudinary, Google Calendar and Gmail APIs, OAuth
AI and ML	LLM APIs (Claude, OpenAI), retrieval-augmented generation, prompt and cost optimisation, reinforcement learning (Stable-Baselines3, Gymnasium, PPO, A2C), imitation learning (DAgger)
Automation	n8n, business process automation, Selenium, PowerShell
Tools and testing	Git and GitHub, Visual Studio, VS Code, Unity, pytest, Streamlit
Personal	Teamwork, communication, responsibility, analytical thinking, self-organisation, fast learning

LANGUAGE SKILLS

Mother tongue: Bulgarian

	Listening	Reading	Writing	Spoken production	Spoken interaction
English	B2	B2	B2	B2	B2
German	A1	A1	A1	A1	A1

Levels: A1 and A2 basic user; B1 and B2 independent user; C1 and C2 proficient user
